Dr. Joshua Lederberg
Osborn Botanical Laboratory
Yale University
New Haven, Connecticut

Dear Lederberg:

Your name will be put down for reservations for June 15-16, and I hope that we will be able to accommodate you.

While he was here Luria made an extensive study of the cross-resistance pattern of the B strain of coli and seven phages. During that study he accumulated a collection of stocks, which he took with him, leaving a duplicate set here. His stocks have been transferred; ours have not, and when we looked them over recently many were dead. Since his collection is in much better shape than ours, I would advise you to write to him for the stocks you wish to have.

I never got B/5 alone. As far as I remember, Luria had a B/5 without 1, but it had 6.

With best regards,

Sincerely yours,

M. Demerec
